

FAST, FLEXIBLE, FULLY MANAGED CONNECTIVITY  
TO ANY LOCATION

The Link-Connect SMART-Hub solution enables you to deliver robust connectivity to your sites via 4G and satellite, which can then be scaled, as the project progresses, without the need to reconfigure security policies, content filtering or IP addresses. You have complete visibility of your network and can control and prioritise all traffic across it. To give your people access to your corporate systems and data from the day your site goes live simply plug in the fully configured SMART-Hub at any site.

Link-Connect can deliver a fully configured SMART-Hub that connects back to our Management Centre so we can monitor and manage the Hub remotely. Once in place, SMART-Hub will support any method of connectivity presented to it with the following advantages:

- **Fully managed VPN** gives you full access to your corporate systems and data.
- **Static IP addresses** mean you are not faced with reconfigurations as we step through connectivity increments.
- **Latest Next Generation Firewall** inspects all traffic entering or leaving site and alerts or stops suspicious activity.
- **Wireless LAN** removes the need for expensive and time consuming wiring - useful for temporary sites or as a way to get running quickly while permanent wiring is installed.

- **Load balancing** makes maximum use of diverse connectivity options supplied to site, without any concerns over IP address changes.
- **Fully managed service** means all equipment can be re-purposed and rotated from project to project.

#### **FLEXIBLE SOLUTIONS**

Choose from 3G/4G or Satellite solutions with a one off installation fee and low monthly costs.

#### **SHORT LEAD TIMES**

With 3G or 4G connectivity your site can go live in less than five days. Satellite takes 5-10 days.

#### **EASY TO ORDER**

Tell us your postcode or grid reference and the go live date and let us take care of the rest - including the decommissioning of a SMART-Hub, reconfiguration and installation on the next project

#### PLEASE CONTACT US

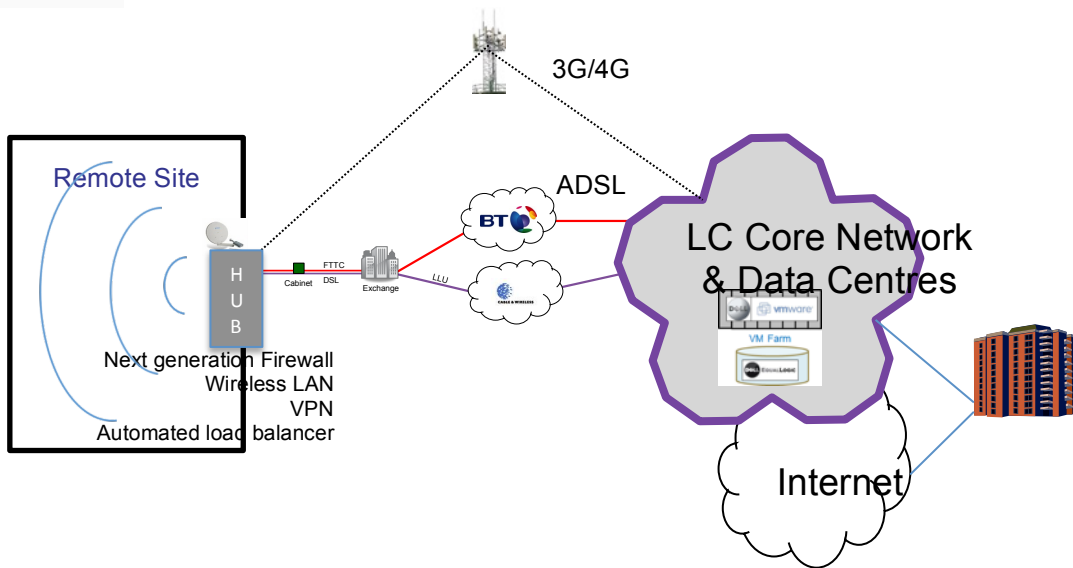

**ADDRESS** - Frensham House, Farnham Business Park, Weydon Lane, Farnham, Surrey GU9 8QT **GET IN**

**PHONE** - 01252 740800

**EMAIL** [wedontbite@link-connect.com](mailto:wedontbite@link-connect.com)

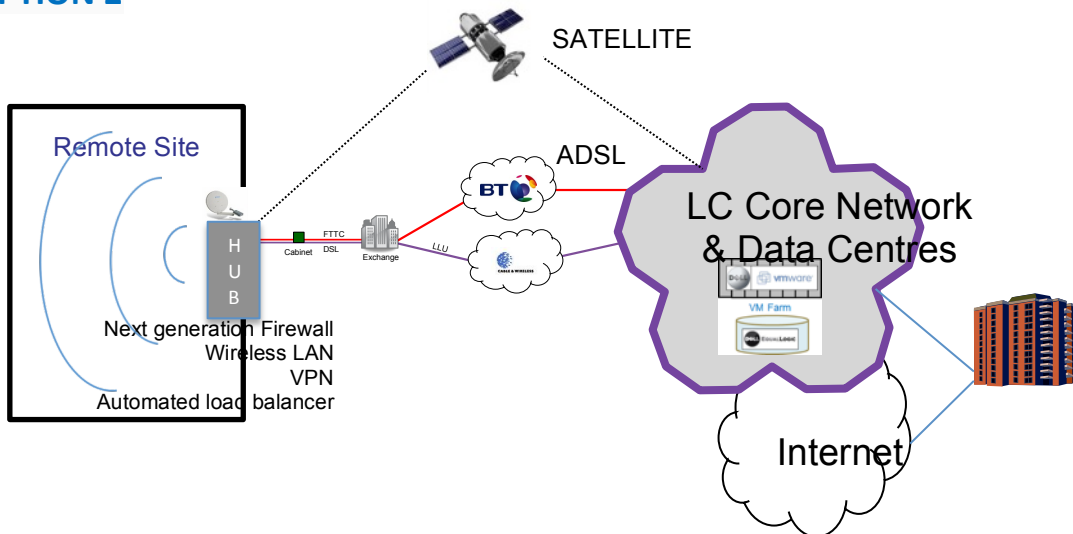

**OPTION 1**

- Initial connectivity via 3G/4G including external antenna
- Dual PSTN (Business Analogue Telephone) Lines
- Next Generation Firewall
- Load balanced dual ADSL2+

- Wireless LAN
- Fully Managed Access to your corporate network
- Access to the Link-Connect Customer Portal
- 1-5 Days Lead Time

**OPTION 2**

- Initial connectivity via Satellite, including hardware
- Dual PSTN (Business Analogue Telephone) Lines
- Next Generation Firewall
- Load balanced dual ADSL2+

- Wireless LAN
- Fully Managed Access to your corporate network
- Access to the Link-Connect Customer Portal
- 5-10 Days Lead Time

Not only is the lead time for SMART-Hub short, but our fully managed service means we handle the reconfigurations needed to step up your connectivity. What's more, we will remove equipment at the end of a project and make sure it is ready for the next job.
