

SCALABLE AND UNIFIED ENTERPRISE WIFI MANAGEMENT

The requirement for Wifi is more and more prevalent as is its purpose, whether it is for business critical applications, guest Internet access or to accommodate personal web enabled devices in the workplace. Whilst there is a common and justifiable demand for a secure and reliable solution, each project has specific requirements that need to be addressed. We specialise in the design and management of Wifi services to meet all requirements, which when overlaid with our proactive and confident support delivers a truly end to end service for all of your users.

The UniFi® WiFi System is a scalable enterprise access point solution designed to be easily deployed and managed.

SLEEK INDUSTRIAL DESIGN

Featuring a clean industrial design, the UniFi® AP can be integrated seamlessly into any wall or ceiling surface (mounting kits included). The LED indicator simplifies deployment and configuration.

SCALABILITY

With its software-based capabilities, the UniFi® virtual control plane enables unlimited scalability under one centralised controller.

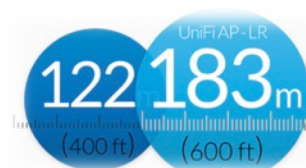

RAPID DEPLOYMENT

Plug and play installation. The intuitive management enables further devices to be deployed to an existing network, simply where the additional AP is 'welcomed' into the group.

LONG-RANGE

UniFi®AP is an industry leader in providing wider coverage with reliable signal strength. The entry-level access points have a range of up to 400 ft/122 m.

SIMULTANEOUS DUAL-BAND WIFI

The UniFi®AP-PRO support up to 300 Mbps, 2x2 MIMO for the 5GHz band and up to 450 Mbps, 3x3 MIMO for the 2.4 GHz band.

LINK-CONNECT'S MANAGED SERVICE

- Central and highly available hosting of the wireless LAN Controller (WLC), supporting all sites, wireless networks and sites.
- 24/7 support per AP
- Configuration and implementation
- Integration of wireless networks into Wide Area Networks
- Bandwidth allocation and control, including guest access
- Application control and dynamic URL filtering

ADVANCED SOFTWARE FEATURES

Intuitive and robust configuration, control and monitoring

Instantly provision and configure thousands of UniFi® APs. Quickly manage system traffic.

Custom maps and Google maps

Upload custom map images or use Google Maps for a visual representation of your wireless network.

WLAN Groups

Take advantage of WLAN groups for flexible configuration of large deployments and enable wireless connection between APs to extend range.

One Unified Network with Zero-Handoff Roaming

Create one large wireless network across multiple APs so users can roam and seamlessly maintain their connection as they switch to the nearest AP.
