

FULLY MANAGED WAN WITH HIGH SECURITY AND HIGH AVAILABILITY

Link-Connect's professional and comprehensive approach to re-designing our WAN and firewall provision has meant that the time we spend managing and troubleshooting is greatly reduced, allowing us to focus on business improvement, rather than fire fighting.

Russell Sayer, IT Infrastructure Manager

Security services customer experience

The GEO Group is one of the leading private custodial and related services companies in the world, managing over 90 custodial facilities in Europe, America, Australia, and South Africa. In the UK, 400 staff help to provide offender management, secure transportation, custody services and facilities management to its customers from three prime locations. In addition, the company operates a number of Immigration centres.

CHALLENGE

The immigration centres operated by GEO tend to be in remote locations and have a wide range of user requirements, which creates security concerns. All residents are entitled to Internet access whilst they await the outcome of their patriation bids, which results in huge penalties to GEO if this is unavailable at anytime. The remote nature of the sites, the requirement for high network security and the need for 'always on' connectivity created significant challenges for GEO.

LINK-CONNECT SOLUTION

Link-Connect proposed a fully managed Wide Area Network service. This includes a variety of connectivity methodologies, including fibre, ADSL and satellite – and at the most remote sites, multiple satellite links.

The deployment of this connectivity is done in such a way to ensure maximum resiliency.

The private WAN configuration means connectivity out of the remote sites runs via the central Link-Connect site. This ensures access to the rest of the GEO network and the Internet is fully controlled and managed.

WHY CHOOSE LINK-CONNECT

We considered a number of organisations when looking to improve our WAN infrastructure. Link-Connect have a refreshingly professional and comprehensive offering, backed by first class engineers, that resulted in us choosing them over the competition.

PRODUCT OR SERVICE

SMART-WAN, next generation firewalls, content filtering and network monitoring & management.

BUSINESS BENEFITS

The fully managed service provided by Link-Connect allows us to focus our efforts on business improvement, rather than day-to-day troubleshooting.
